

State Revenue Catalog Order Form

The State Revenue Catalog, Second Edition, Edited by Dave Wisley

The State Revenue Catalog, Second Edition, is the culmination of aggressively seeking out unlisted state revenue stamps from all collectors. In addition to illustrations in color, numerous images are used to illustrate design features and design changes, rather than only written descriptions. Catalog values have been updated.

Among the new catalog's many features are:

- Illustrations in color
- Detailed illustrations of design features
- Hard bound
- More than 700 pages with updated catalog values
- Informative Introduction and Identification aids
- Contributions from 60+ specialists
