<b>Florida</b>	(update, clarification) Documentary Meter Stamps. Stamps are listed by confirmed paper type. The paper type for a few listings may not be known since information may have been obtained only from insufficient quality images. Also, since paper patterns may be somewhat fugitive, only listings confirmed with plain paper in unused examples, or only with unknown paper type (noted as such), are listed without suffix. In these cases for which no patterned papers are known, a used value may be indicated.  [See also New listings for description of Type 6 patterned paper]	
<b>Florida</b>	(update) Documentary Meter Stamps. DM20e re-numbered as DM20f. Paper pattern is Type 6. [See previous.]

<b>Idaho</b>	(clarification, update) Beer, 1939 series B25-B29. The longer sheet number panel is 25-26mm long with parallel lines, all with the same horizontal position. The shorter panel with evenly spaced lines is a less common pane/sheet variety, so far observed only in position “f”. B25b/B25c have the shorter sheet number panel, and even/uneven lines respectively. (Wrisley, Matesen)	
<b>Idaho</b>	(additional information) Beer. B41a with sans serif “No.” and sheet number is a sheet variety. B42a, B44a, B45a, B46a and B69d have also been confirmed as sheet varieties. (Matesen)
