President's Notebook by Hermann Ivester

President's Letter – 1st Quarter, 2009

I want to thank you for giving me the opportunity to serve as the SRS President. While I am a long time member, I have not previously devoted a great deal of time to the affairs of the SRS. I began collecting postage stamps when I was 7 or 8 years old. I was attracted to the stamps on various tobacco and liquor products soon thereafter. I was not deterred by the fact that respectable collectors held these stamps in low esteem. I joined the American Revenue Association in 1955 at the age of 13, and the SRS in 1963 and have been a continuous member in both organizations. I bought state revenue stamps from both Frank L. Applegate and Bert Hubbard beginning in the mid-1950's and do not know why Bert did not ask me to join the SRS when he founded it in 1959. It may have been my age, or it may have been the fact that I had sent him, for cataloging, the discovery copy of Arkansas Malt Stamp SRS MA7. When I finally asked him to return it he said he couldn't find it. I simply did not understand how that could happen at that time but, unfortunately, now I do. The stamp arrived in the mail unannounced one day, a number of years later, with the simple explanation that it had turned up. I believe this is still the only known copy of MA7.

I have started a multi-year process of disengaging from my law firm. I believe that I will now have the time required to carry out the duties of the President and am excited about the future of the SRS.

The following projects will be my top priorities this year:

First Priority

As Peter Martin mentioned in his last President's letter, we need to revise and update our constitution and bylaws. My plan is to ask the Board of Governors to adopt a new Constitution to present to the

membership for adoption and for the Board to adopt new bylaws. Both the Constitution and bylaws will be included on the SRS website.

Second Priority

The second priority will be to develop a plan and proposed schedule for updating the *SRS State Revenue Stamps Catalog*. This catalog was published at a time of heightened interest in state revenues and, in turn, has helped promote that interest, as well as increase our membership. Nevertheless, the catalog has numerous flaws and gaps that must be corrected and improved, and many previously unreported stamps need to be included. We currently are working on update number two to the catalog which will consist of replacements for certain of the current listings. Anyone who has corrections or unlisted items for any state is urged to report them to the Editor as soon as possible. Beyond this we will have to determine a schedule for publication of other updates and whether we should put trial listings, by category or state, on the website for comment before publishing. These are only two of the questions that we must deal with.

We also need more catalog coordinators. The list of coordinators reflects that twelve states lack coordinators, and additional coordinators for the states already spoken for would be welcomed. Each of you knows something about some area of state revenues that the rest of us don't. Even if your expertise is limited to one category of stamps, one state, one region or otherwise, please let us know what it is and share your knowledge.

I have appointed a new Catalog Review Committee to review all updates to the SRS Catalog. Members of the Committee are all officers and governors (myself, Harold

Notes on the Large Kansas Egg Stamps

by Charles Glenn

This comes after I have studied the SRS catalog listing of Kansas egg stamps and the letter from Michael Florer in the *SRN* letters to the Editor in 3rd quarter 2008 issue. Mike Florer has also been kind enough to supply me with information from his collection, along with Peter Martin.

First, concerning E43a (Imprint:25-4511-2-W15-60) and E51b second one listed in catalog (Imprint 25-4511-2-W15-60) - I have the one listed E43a (actual imprint: 25-4511-2W 15-60). I believe the imprint on this stamp doesn't indicate the date the stamp was printed. The format and size of the stamps fits E13. Its size fits E13 exactly. It has no stars on it. The lettering on it reads "KANSAS STATE BOARD OF AGRICULTURE". Egg stamps after E28 read "KANSAS INSPECTION FEE...". "KS DEPT of AGRICULTURE" does show up on E80 and E81. I take E51b to be of same size and format. It would appear the stamp listed E43a is either E13 or a sub-variety of E13, and the stamp listed E51b (2nd listed)

26-112-2 7-55-10M

E51b

26-112-2 7-55-10M

is either E15 or a subvariety of E15 and Michael Florer concurs.

Michael Florer's letter, these are my thoughts.

Concerning the duplicates listed in

The imprints do relate to the stamps printing date. Thus one imprinted "5-55-10M", I take to read "May 1955, 10 thousand printed". Michael seems to group those with serial numbers with those without serial numbers.

However, he does have a point. It is not likely that stamps with the same wording and format would be printed some with a serial number and some without a serial number on the same date.

If it is improbable that like stamps were printed two different ways, there are duplicates listed. My notes show stamps with out serial numbers were first noticed by me on a sale list of Barry L. Porter Sept. 1991. I am sure I purchased mine from him. He listed them as 35a, 36a, 43a and 44a.

Attached is a list of possible conclusions to the duplicates. It needs input from other sources. I hope it can be helpful.

SRS Catalog	Imprint	Serial Number?	Known to me
E35	25-8951-2 @ 5-55-10M	yes	yes
E35a	34-4457-2-s* @ 6-72-500	no	yes
E36	5-55-10M	no	question existence
E36a	25-8956-2 @ 5-55-10M	yes	yes
E36b	34-4458-2* @ 6-72-500	no	yes
E43	25-8953-2 @ 5-55-10M	yes	yes
E43a	see above		
E43b	30-1342-2* @ 10-63-10M	no	yes
E44	5-55-10M	no	question existence
E44a	25-8957-2 @ 5-55-10M	yes	yes
E44b	26-113-2 7-55-10M	yes	yes (Florer)
E44c	34-5546-S2-59 @	no	yes
E51	5-55-10M	?	no ¹
E51a	7-55-10M	yes	yes (Martin)
E51b	26-112-2 @ 7-55-10M	yes	yes
E51b	see above		
E51c	10-63-10M	no	no ²
E52	5-55-10M	no	question existence
E52a	25-8958-2 @ 5-55-10M	yes	yes
E52b	7-35-10M	yes	yes (Martin) ⁴
E52c	26-81-2 @ 7-55-10M	yes	yes
E52d	24-4456-S2-59	no	no ³
E59	25-8955-2 5-55-10M	yes	yes (Florer)
E60	5-55-10M	no	question existence
E60a	25-8952-2 @ 5-55-10M	yes	yes

In Table 1 we are using @ to represent the union label which reads "ALLIED PRINTERS/TRADES COUNCIL/ TOPEKA". On some stamps, only the last number after the union label has been reported.

Does E519 have serial numbers?

Note 1 - E51 "5-55-10" - one would expect printers number "25-985?-2"

Note 2 - E51c "10-63-10M" - printers number "30-??" See E43b.

Note 3 - E52d - Catalog shows "24-4456-S2-S9" One would suspect "24-" to be a mistprint on the stamp or in the catalog and should be "34-".

Note 4- The E52 variety possessed by Peter Martin with the 7-35-10M was reported just as this article went to press. More information is needed. It may be a misprinted 7-55-10M.

All my 5-55-10M have serial numbers and so do Mike Florers.

After stating that the printers imprint does not consistently reveal the date stamps were printed (or ordered), I want to point to another pattern that may help date them. It involves the leading numbers in the imprints. I think you will find it interesting. This is shown in table 2.

Here are my conclusions about duplicates.

- E21A Does not exist
- E21B same as E16
- E36a same as E36a
- E43a same as E13
- E44a same as E44
- E52a same as E52
- E51b(2nd) same as E15
- E52b same as E52c

Table 2.

1952 "24-"		
E17	24-5227-6-S	9-52-50M
E20	24-5228-6-S	9-52-25M
E21	24-5228-6-S	9-52-25M
1953 - May 1955 "25-"		
E16	25-3410-W-23-63	6-54-10

Little Mystery

Jim Timpson sent this in with the question, "Is this a Michigan beer stamp?"

Florida Eggs

Dave Wisley has put up a new article called "Unscrambling Florida Eggs" on his website. This article clarifies identification of several Florida egg stamps, and attempts to explain the origin of a unique rouletteing variety.

Dave's site can be reached from the SRS <http://staterevenue.org> website, in the Links section under Florida State Revenues.

Library Notes

Peter Martin

The SRS Library Has Moved

This is the first of a new column to help you better use the resources of the SRS Library. The column will provide user information for the library and review publications in the library to assist researchers. In addition, I'll answer questions related to SRS Library and SRS Archive resources.

As announced in the philatelic press, the SRS Library was moved in December to the American Philatelic Research Library in Bellefonte, Pa. The APRL maintains the largest repository of philatelic publications in North America.

The SRS Library moved to the APRL to give it a permanent home and to provide broader exposure to a wider audience. It also provides SRS members access to the APRL's state revenue publications; provides a destination location for anyone who wants to research the entire library and gives SRS members access to fulltime professional librarians.

Several other organizations have made the same move including the American Air Mail Society, the American Helvetia Philatelic Society, the British North American Philatelic Society, the Postal History Society and the Military Postal History Society.

As soon as the SRS books are accessioned by the APRL, likely in time for the Second Quarter *SRN*, we will publish a list of all state revenue related publications that are available.

How do you borrow a book? You can request a book by phone, FAX or e-mail. If you are an APS member you are likely familiar with library procedures and nothing will change. You have access to the entire APRL holdings.

If you are not an APS member (and you are not required to be

a member), you have access to all State revenue related publications by providing your SRS membership number. The APRL will have a list of member names and membership numbers to confirm your lending privileges.

To borrow a book, simply identify yourself as an SRS member and provide the name of the book(s) to the librarian. The APRL will ship the books to the address you provide along with an invoice. You will be responsible for postage both ways.

When members borrow materials through the mail, the APS provides a return mailing label and a signature confirmation form. Some books may require postal insurance. You can also request photocopies of articles on a per page basis. All related fees are listed on the APRL website.

You can get to the APRL through the APS website www.stamps.org and going to "The Library" link or directly to www.stamplibrary.org. Gini Horn is the librarian and she can be reached at (814) 933-3803; Fax: (814) 933-6128 or by writing to APRL, 100 Match Factory Place, Bellefonte, PA 16823.

On the APRL site there are helpful links, including "Using Library Services," "Fees for Library Services" and the "Online Catalog" where you can search for books, journals and articles.

You can also now inspect all the books, journals and related publications at one time by visiting the APRL in central Pennsylvania.

Note that while we have a permanent filing cabinet in the APRL, the SRS Archives have not been moved and are still accessible by contacting me at pmartin2020@aol.com.

Santa Barbara Bicycle Plates

by John Boal

Here's one for your city revenue collectors. This is an extremely rare pair of bicycle license plates from the City of Santa Barbara, in California from 1942. These plates folded over the, pardon the expression, ball buster bar, on the bike. The plates could then be seen from each side of the bicycle. Why this was done I don't know. I have never seen anything like it before, and, I actually have another pair, but the center metal is gone, leaving only the two plates with a bit of tin attached to the tops. Weird stuff out there.

Minnesota Walleye Stamps

An article in the October 2008 *Duck Tracks* indicates that Minnesota passed a law in 2008 creating the voluntary walleye stamp, which will add \$5 to the cost of a 2009 Minnesota fishing license, if the angler chooses to purchase the stamp. Revenues from stamp sales will be dedicated to walleye stocking and directly related activities. The Department of Natural Resources is sponsoring a wildlife art contest, open only to Minnesota residents, to design the stamp. The design was apparently selected Oct. 30 at Department of Natural Resources Headquarters.

The issue also includes a fine article by Ira Cotton on "Uncataloged Stamps" including California lifetime hunting, Maryland duck blind stamps, Louisiana and Florida fishing, West Virginia self-adhesive hunting, and overprints on South Dakota stamps.

Duck Tracks is the journal of the National Duck Stamp Collectors Society, which can be joined for \$20 by writing to them at P.O. Box 43, Harleysville, PA 19438-0043.

Union Labels

by Brian Roberts

I read with great interest your note on union labels in the 2nd Qtr 2007 issue (Letters to the Editor). I started collecting these over 50 years ago at my Dad's suggestion (he was a union officer). Unfortunately I gave away my collection. Now I'm an active union member and have started collecting again. I get them mostly on eBay, and the ones I had then are now kind of pricey to replace. It's not because of their intrinsic value, it's because the items they're stuck to are now antiques.

Amalgamated Clothing Workers of America

With regard to the cigar union (CMIU) labels, check out Dr. Tony Hyman's awesome web page on "Dating Cigar Boxes," http://www.cigarhistory.info/Site/Dating_boxes.html. He has not only the history of the CMIU labels, but also of the federal taxpaid stamps with excellent photos. Actually the CMIU labels were not the first, although they were the first on paper and the first used nationwide. In 1869 the Carpenters' Union of San Francisco had started stamping "Eight-Hour League" on lumber to show it was cut in union shops that had adopted the 8-hour workday.

Bakers Union label

I collect both the adhesive labels and the ones that are integral with the product. Thus my collection now includes a stack of cigar boxes (the sawyers' and carpenters' labels are pressed directly into the wood), boots, shoes, tobacco tins, a roll of wallpaper, and several bottles. I'm still trying to figure out how to albumize and display these materials. How, for instance, do

you display the Cement Masons' label, which is stamped into the pavement? I haven't yet seen such a block of cement for sale, but will find a place for it if I get one.

International Union of United Brewery and Soft Drink Workers label

I've started a catalog and aspire to someday being the Hubbard of union labels. I have a long way to go; I can't even assign ID numbers yet because information is so spotty. I'm enclosing photos of some of the more stamplike labels, issued by the clothing workers, bakers, brewers, carpenters, hatters, postal workers, stove mounters, and upholsterers.

United Brotherhood of Carpenters and Joiners of America label

The most common labels are the little oval "bugs" of the printers or lithographers, which are often found on larger labels. They also sometimes appear on state revenue stamps, such as CO WL37, FL E19, MI W87, and MN W4.

1910 United Hatters of North America

More Sheet Numbers, Not Serial Numbers

by M.E. Matesen

In an article in the 1st Quarter 2005 SRN, Terence Hines showed some New Hampshire tobaccos and other stamps where what was assumed to be serial numbers on the stamps are actually sheet numbers. The way these can be distinguished is that all stamps on a sheet have the same number on sheet numbering, instead of each being different in serial numbering.

The Idaho beer stamps, it turns out, are sheet numbered. Shown at right is part of a sheet of Idaho beers (B1) showing that the number is a sheet number, and the small letter is a position number. The same is true on all the Idaho beers and beers-in-transit and the new SRS catalog was changed to reflect this.

A second example is this Illinois beer SRS B80 pair shown.

I'd appreciate any photos or info about union labels that anyone would like to share with me at rob40@msn.com. Maybe we can start a group.

American Postal Workers label with mail bag.

1938 Upholsterers International Union

California Paper License Plates

by John Boal

I am enclosing a scan of the 1944 California windshield sticker mentioned in the article by Michael Florer in the 3rd Quarter 2008 *SRN*. These used to be quite hard to find, but recently a number of them have surfaced. Actually, California has issued quite a few paper license plates.

These are two more paper license plates issued by the California Department of Motor Vehicles. They were issued when someone bought a car. They were temporary permits valid until the person's new registration was received. I have no idea why the DMV deemed it necessary to use the word "emergency".

The next picture is of two 1953 paper plates; one for a used car, and the other for a new car. The use of the N and U were later dropped, and the only way one could tell new from used was to read the fine print at the bottom of the paper plate. These plates were displayed in the rear window of the car. They were used all the way up into the 70's.

I have another paper plate from the teens which was used when a car was moved from a train to the dealership. Unfortunately my picture is not too good so I have not shown it here.

Back to the paper plates: California still issued a small square paper with 1-12 printed on the face. They are red on white, and are displayed in the passenger side windshield. Each number represents the month of expiration for a temporary permit. Very generic looking.

California also issued paper licenses to people entering the state who had out of state license plates. The paper license allowed the driver to keep the out of state plates for a specific period of time, usually 60 days, and then they had to remove the

plates and mount the California plates that would have arrived by that time.

Oregon Liquor Seal

by Scott Troutman

Shown is an unreported Oregon liquor seal, for now called LS6. This decal is green on white, with a red serial number. It has the imprint of "AMERICAN BANK NOTE COMPANY" and is 18x26mm. This particular example has been used.

Louisiana Tobaccos

Patrick Gagnon sent in these two stamps and after consultation with Keith Hill we believe they are two that have not been previously reported.

This four cent green stamp on green safety card appears to be part of the 1945 set as both flowers are present on the tobacco. For now we are calling this T44A.

This stamp would seem to fall between T67 and T68 in the 1969? set. It is a 40 cent tobacco tax decal, brown on bright yellow on a cream rouletted safety card. This we are calling T67A.

Alaska Scale Repair Seal

by Scott Troutman

The scale seal shown came up for auction in the Sam Beck auction in October 2007. It is blue on white and a self adhesive on a white backer. The design is about 69x36mm. This appears to be what the Alaska Division of Measurement Standards uses on scales which are defective and not to be used while awaiting repair.

Unreported Kansas Egg

Arthur Lifshin sent in this Kansas egg. It is dark blue, imperforate and the design measures 206mmx127mm. Given the wording "KANSAS STATE BOARD OF AGRICULTURE" it may have been used in the 1950's. After that Kansas used "Kansas Inspection Fee" wording on the large stamps. There is no printer's indicia.

Wisconsin EC2

by Scott Troutman

This is the Wisconsin EC2 egg candling stamp. This is for 30 dozen eggs and was used 7-10-32. This was used by "Allington & Van Ryzin, Stratford, Wis." In the lower corner is a place for the candler to mark his name. There is a printer's indicia at lower left but I cannot read it from this bad copy. This is from an E-bay image where Kent Gray bid on this stamp back in 1999.

California Egg Stamp

by Michael Florer

Shown above is an unlisted California egg stamp. It is black on a yellowish paper. The black handstamp is "NOV 30 7885".

Alabama Playing Cards

Tim Russell, Commissioner
State of Alabama Department of Revenue
Sept. 22, 2008

To: All Playing Card Distributors and Taxpayers

It has come to our attention that there may be some misunderstanding regarding the taxation of playing cards distributed in Alabama.

Alabama Code Section 40-12-144 provides for a \$0.10 license or privilege tax on playing cards containing not more than 54 cards to the deck or package. The American Heritage Dictionary defines playing card as "a card marked with its rank and suit belonging to any of several decks used in playing various games." Examples of these games would include poker, rummy, bridge, etc.

The \$0.10 revenue stamps must be affixed to the above described deck of playing cards. Adding additional jokers, game or instructional cards to the deck of cards will not exempt the cards from the \$0.10 tax. Also, placing the deck of cards within a game does not exempt the cards from the tax. In this instance, a tax stamp for each deck of cards placed inside the game must be affixed to the outside packaging.

Taxable playing cards found in the possession of any person, firm, corporation, club or association without having stamps affixed shall be subject to

confiscation by the Alabama Department of Revenue. Persons failing to properly affix the required stamps to any playing cards shall be required to pay, as part of the tax imposed, a penalty of not less than twenty-five dollars (\$25) not more than five hundred dollars (\$500). Each article not properly stamped shall be deemed a separate offense.

Should you have questions regarding this notice, contact us by mail at the Tobacco Tax Section, P.O. Box 327555, Montgomery, AL 36132-7555 or by telephone at 334/242/9627.

New York Habitat Stamps:

Number Issued

by Terence Hines

The New York Department of Environmental Conservation has provided the number of New York habitat stamps issued each year since their introduction for the 2002-2003 license year. The numbers are:

Year	Design	Number sold
2002-2003	grouse	3848
2003-2004	trout	7710
2004-2005	beaver	6973
2005-2006	blue bird	7946
2006-2007	turkey	8234
2007-2008	deer	8854
2008-2009	duck	8206*

*As of Nov. 5, 2008

Unreported Arkansas Eggs

by Kent Gray

Shown is E8A, like E8 but in red. I also have the same exact design in light blue, but it is on an entire egg carton. Blue version E8B. Not a shocker, but the color of the stamp is the same as the color of the entire printing for the carton. My guess is there are many versions, based off the printing for the various egg farms.

Notes on Arkansas Egg Stamps

by Michael Florer

I have an unlisted stamp like E4 and E5 but 12 mm between rows and 12mm between stamps.

E9 through E15 are not imperforate stamps but are all cut-squares from egg cartons (see 1968 SRN).

My E9 is 34x16-1/2mm. I don't know if this is a new variety or they are all actually the same size.

Idaho Egg Corrections

by Michael Florer and Kent Gray

E20

Both Michael and Kent note that the paper color on E20 should be yellow and not buff.

E20A

E20B

Both also note that the checks in the old Cabot Type I eggs were accidentally skipped. The E20A one dozen is on a buff paper and the E20B is on a white paper.

Cigarette and Cigar Finds

by Kent Gray

Kentucky

This heat fusion is like C26 except the color is brown on tan. *This will become C26A.*

This one will take some research to figure out (as far as what law specified it), but here is a Kentucky cigarette taxpaid. It is imperforate 40x19mm. *For now we will call it C28.*

Louisiana

The decal at left is Louisiana C5 in black on red. The stamp at the right is an unlisted version of the same design with black on yellow. *This will be C5A.*

These heat fusions, all of the same design, are C7, C8 and C9 respectively. C7 and C9 were not pictured in the catalog. The colors are blue, olive and red-orange respectively.

Connecticut

This used decal is the same as C45 in the catalog except it is black on a light orange-yellow. *This will be C45A.*

cigar in the new SRS catalog. *It is CG46 a stamp we did not have pictured.*

This heat fusion is like C47 in the catalog but is black on red with white under GEORGIA and the value. *This will be C47A*

Delaware

This is Delaware cigar CG1 and it has a red serial number. I point that out only because CG2 specifies it has a red serial number - they both seem to.

Idaho

This heat fusion is like C12 but is black on gray. It was found in 2007. *This will be C12A.*

Illinois

In the SRS catalog the color of the Illinois C15 decal was not given. It is black on yellow.

This is a poor copy a heat fusion like C7 but the background is pink and not white. *This becomes C8.*

This ratty decal is of the same design as C21, but is blue on white for 20 cig. *This will become C20A.*

Indiana

This heat fusion scanned kind of bluish but is actually black on white. It is the same as C23 in design. *This is C23A.*

Georgia

I couldn't find this lavender 75 cent

Arizona and Florida Egg Comments

by Michael Florer

Arizona

An article in the October 1962 issue of *SRN* reported that these stamps were discontinued in 1952.

Arizona has a new egg inspection stamp. It no longer has a map as so

many egg stamps do. One dozen green roulette 6%.

Charles Hermann first report the subsequent issues in his "State Tax Notes" Column in *Weekly Philatelic Gossip* back in the 1940s. They provide some great information. On May 31, 1947 he reports the E11 stamp in the SRS catalog. Note he says it is roul. 6-3/4. He makes no mention of buff paper and mine are all on white or off-white. Unless you know differently, it seems the paper color could be deleted. However, I do have this stamp on two types of paper - smooth and rough texture.

On July 17, 1948 he reports a black egg meter printed directly on egg cartons. His description is good but unfortunately his illustration is very poor.

Arizona has the first of a new series of tax meters—P. B. meter 9901 on a carton of one dozen eggs. "STATE OF—ARIZONA" in two lines at top, double circle with large "1" in center, "DOZEN—EGGS" between circles, "INSPECTION—FEE PAID—P. B. METER 9901" three lines at bottom, all inclosed in 28x41 mm. double lined frame, black.

On July 16, 1949 he reports the stamps in the SRS catalog as E10 and E10a.

Note that he uses different terms for the colors. Also he reports another egg meter in red. So I would change the order of the listing for these stamps with these dates, i.e. 1947 issue and a 1949 issue. Also I would recommend adding a separate listing for the two known meters and I guess the prefix would be "EM". As far as I know, Arizona was the only state to use Meter stamps for egg inspection.

Florida

I have E10 without a serial letter and E14 with serial letter "S".

My E33 is read and my E35 has a yellow serial number; perhaps shades exist for the color on these.

My E43 has 9mm high letters in the title.

I have E53a that is Series E.

E55b and E58 should say "white smooth paper".

E80 Series X could be Series K. Mine is mostly a blob for a letter but looks more like a "K" than an "X". Other examples need to be examined to tell which it is or if

both exist.

I have full planes that have E59a in position 4 only and E61a in position 3 only. Perhaps the position numbers should be deleted.

A Note on Ebay

by Scott Troutman

In late 2008 Ebay, the giant online auction, made a move to force all buyers and sellers to use Paypal, a payment mechanism using credit cards. This is significant to SRS members as a lot of the state revenue stamps are sold on Ebay. My thinking is that this may be one of the dumbest business decisions of our time.

60% of Ebay's customers did not use Paypal, and for many like myself, that was a conscious choice. I once tried to set up a Paypal account, it got messed up, and there was not a single person I could find at the time to give assistance. Paypal users tell me that is still a problem. Paypal is great for doing worldwide business, as it does exchange rates smoothly. But I get endless phishing attempts to steal Paypal passwords every time I buy or sell on Ebay.

The problem is, many people have just stopped using Ebay. Eric Jackson in a newsletter, noted that 60% of his online customers were complaining about having to pay through Paypal - and while there are work arounds, they are not smooth. If even 10% of the customers drop off, that is a whole lot less bids to move prices upward, and in many cases a whole lot less sales. Reports on the radio program Wall Street Week, indicate Ebay's financials have taken a steep turn downward.

I think auction realizations are falling on Ebay - not because of the economy, but rather because of this Paypal decision. That is good news if you are buying but bad news if you are selling.

Nebraska Seed Potato Inspection Tags

By Kenneth Pruess

I recently found an inspection tag for seed potatoes which is illustrated here. Cut in the shape of a Nebraska map, black on yellow, Dennison imprint on patch, overall size is about 145 x 70 mm. These tags are covered under the Nebraska Seed Certification Law. The first Nebraska seed law was passed in 1915. There have been many revisions, the most recent apparently in 1985¹. These laws dealt primarily with purity, germination, and freedom from noxious weed seeds. Inspection fees are based on pounds of seed sold. Labels or tags are required but are not based on pounds and apparently are produced by the seller. Although I have no examples, it seems questionable if they could be considered tax tags.

But seed potatoes provide a different situation. Inspections in the field as well as for the final product are required. The complete rules on Seed Potatoes can be found on the web site of the Potato Certification Association of Nebraska². Inspec-

tion fees are based on both acreage and cwt (hundred weight). Tags are provided at 5¢ each. There seem to be 2 primary grades, blue tag and yellow tag. I have seen only the illustrated blue tag. Understandably, these tags are sold only to those persons who have met all requirements for certification. Are these tax tags? You decide. If so, I suspect a huge variety of such tags exist from many States.

New York Stock Transfers - Suggestions for Improving the Catalog

by Doug Davis

I finally finished going through my NY Stock Exchange duplicates (about 3000 of them) and have a couple of recommendations for future updates to the catalog.

First, is the change in design after the 1906 series which is not noted in the catalog. The 1905 and 1906 issues with the Type 1 and Type 2 corner designs are clearly described and illustrated. But, starting with the 1907 series the catalog sort of slides over the design changes and gets into perfs and overprints. I recommend adding insets to show the design change of a least the corner ornaments (spades before 1907, clovers afterward).

Additionally I recommend an illustration of the dots added to the center of the

ST27 Spade Design

ST36 Clover Design

clovers beginning with ST69 through ST86. The catalog mentions the addition of the dots but is a little vague as to their location. I have included images to illustrate my recommendations.

I found one instance of Phat Phingers in the note after ST115f. I believe that it should read "above "ran" of "transfer" while ST104 does not" instead of "white ST104 does not."

Editors note - I have indeed added these illustrations into the catalog.

ST66 Clover without dot

ST77 Clover with dot

President's Notes-

Continued from page 2.

Effner, Kent Gray, Terry Hines, Peter Martin, John Bowman, Jim Timpson, and Dave Wrisley). In addition, Mike Florer, Ed Kettenbrink, Ron Leshner, Mack Matesen, and Ken Pruess have agreed to serve on the Committee. All proposed revisions to the SRS Catalog will be circulated to all members of the Committee plus all relevant state coordinators for review prior to publication to insure as much accuracy as possible. Publication and distribution will be handled by the Publications Committee as it has been previously. We hope to communicate with members through the SRS Website, so please check in fairly frequently. Do, however, be patient with us.

The state of your Society is very good, as I believe is evident from Peter Martin's summation in the most recent *SRN*. I would like to thank Peter and Scott Troutman for the fine job they both have done for many years as is reflected in Peter's report.

There are many things we need to do in addition to those mentioned. One thing is to get and keep as many members as possible involved with the Society, by serving on a committee, writing articles for the *SRN*, reporting unlisted stamps, cataloging areas of stamps in which they have special expertise, or perhaps in some other way.

Annual Meeting

The SRS will hold its annual meeting at Chicagopex, November 20-22, 2009. At this writing the SRS is not on the list of participating societies but expects to be included. The meeting time will be announced in the next newsletter and on the SRS website. There is still time to enter an exhibit. Anyone who is interested should check the Chicagopex website for an application.

SRS Catalog Wins a Literature Vermeil

At the Chicagopex 2008 stamp show, we entered the SRS catalog in the literature competition and it took a vermeil medal. Congratulations to editor Scott Troutman and the whole publishing committee team.

Also, if anyone would like to make a presentation to the SRS members please contact me and we will set a meeting time for the presentation.

I believe we have the opportunity to make the SRS one of the premier specialty societies, and will be working toward that goal. If you have any suggestions or comments or wish to volunteer your help in any way, please contact me at ivesters@swbell.net.

Jim Onkst

by Scott Troutman

Word reached me just as I was going to press that old friend Jim Onkst died unexpectedly Jan. 10, 2009. An active member of the Oklahoma City Stamp club Jim collected Kansas quail and Ohio sales tax among his many philatelic interests. In addition to stamps he collected coins, medals, bottle openers, shoe horns, oil cans, old tools, books, antiques and Masonic memorabilia. Jim was an inventory management specialist at Tinker Air Force base, a deputy Sheriff, and a leader in the local Masonic lodges.

He leaves his wife Margie, three children, and five grandchildren. His grandson Corey Deason is also a stamp collector.

State Revenue Research Files

The SRS library maintains state files available for researchers. Correspondence, order forms, regulations and news releases are examples of the type of items in these files. Over the years much material has been lost because collectors changed collecting interests and discarded old references, moved and no longer had room for extra files, or passed on and their heirs threw out the paper items. If you've done any kind of research, your files will be of interest to a current or future collector. Preserve the efforts of your labor by sending a copy of your files to the SRS Library. If you have unneeded material, send the originals. Mail to:

SRS Library
POB 463
Naugatuck, CT 06770

SRN Back Issues

Single back issues are in stock only from 1994 #5, 1995, 1996 and 1999 #4. Otherwise 1995 thru 1998 are only sold as year sets (see below).

Photocopies of out-of-stock back issues are available for 15 cents per page. Inquire first and send a SASE.

Issue Date**\$5.00 each**

Editors Notes

Putting Together an SRN

It seems like I am always pushing on people to get in articles and columns so I can get the journal out on time. This is one of my least favorite jobs. I should note the reason the 4th quarter came out late was that the labels got lost in the mail going to the printer, and Kent had to remake and resend them (interestingly the originals did finally pop out at the printers almost a month later). Anyway, I thought it might interest you to know the process I use.

When an issue goes off to the printers, the first thing that happens is that I gather articles from the ever growing stack awaiting publishing that support whatever theme the next issue will have (eggs, meters, soft drinks, a particular state). To this I add articles with a time sensitivity (upcoming auctions, auction results, fish & game updates, etc.). This forms what I call the "must go" pile that is the basis for a new issue. Note that I work from articles "in hand". This is why I always tell people, send it in and don't try to write articles for the next issue. You are usually already too late. Articles "promised" have a great tendency not to show up in time and they tend to be the large articles.

The next process is called clearing, which is copying the last issue, removing all the articles, resetting page numbers and volume-issue numbers, dropping ads that have expired, resetting the secretaries report, etc. Note that even when cleared about a quarter of the journal is already full with research requests, ads, and other standing things that stay.

Then I start laying out the new issue. Biggest articles are done first as these require the most open space. Auction space is roughly reserved as is a page for auction results. By the time an issue gets to the readers it is not unusual for most of the next issue to already be laid out.

The auction deadlines are usually set about a month before the planned ship dates. This gives me time to do the auction, which takes the most time to layout. It normally takes a nights work to sort it down and assign the lot numbers, and at least another night or two to put just the wording into the journal (a lot of information gets stripped off). Then comes

making the pictures for the auction, a tedious process that takes up to week to scan the pictures. This is an imperfect process wherein I try to assure that each consignor gets pictures in, the items most needing illustrated get in, and the remainder are items that will show well in black and white. Big auctions can force extra pages (we have to add four pages at a time due to the printing process). Any extra space left over then has to get filled.

Lastly I get in the Presidents column and the Secretaries last updates, and from that point I can see what remains to be filled. Now I have to fit in the editor's column, and shoehorn in the smaller articles. The next process is to print out the whole issue and proofread it. This usually kills an evening.

Now that we are doing some color, I then have to pick which pages to colorize. Four pages are printed on a single sheet of paper at once, so I try to pick those that will maximize the color you see. This can require moving some pages around. As we are only doing three of the four page sheets in color, it can make for tough choices. At this point ending auction dates get set.

Note that while I have a shipping date planned, life intrudes with vacations, illnesses, visits from relatives, weather, outside commitments and half a dozen other things that have to be worked around. This is why I like things as early as I can get them.

Then it gets packaged for printing, a software process that takes an hour or so, as the issue is pulled off for the printer in Pagemaker, all illustrations are extracted and type fonts are prepared. This goes on a CD which is mated with mailing labels, and any inserts like auction bid sheets and dues reminders get added, with instructions to the printers. And with luck, in about a week it is shipping.

In this issue we have another huge auction. I actually had to hold some consignor material to the next auction as this one was just getting too big. Lots coming in the 2nd quarter auction. A ton of Florida and South Carolina and a run of Alabama playing cards you don't see often in this one. A lot of good fish and game scattered in there. But lots of goodies from everywhere.

Wondrous Things - Finds From All Over

by Jim Timpson

Since the new SRS Catalog has come out no one has sent me more changes than Jim Timpson. Here I have gathered up a number of Jim's finds and observations from the past year. Editor.

Georgia

This decal is an unlisted 5-1/3ct value of the Georgia beers 1955 set. It is black on green on a green backer with a red vertical safety. This will become B21A.

5c OYSTER TAX PAID 5c
GEORGIA GAME AND FISH COMMISSION
For 1 gal. Raw Shucked Oysters
or 2 Bushels Oysters in Shell

Shipper.....
Date

What is it? It is not found in Cabot, Hubbard or the SRS catalog? It is roulette 7 and is dark blue on white.

This has become OY24. It was also reported by Dave Wisley and Michael Florer. A 5ct black version also exists, perforated 12 horizontally (OY25).

Indiana

I got this \$1 1959 intangible stamp overprinted with a purple "1958" from a well respected source (John Becker) so I believe it's authentic. I would say this is unique and much more rare than D234a the \$5 with similar overprint. This would be D232b.

Missouri

Liquor five cents Bates-Hewett green decal, not listed. L177B. I also have a 1ct lilac Bates-Hewitt decal which will become L177A.

I have an L158a Henderson-Bell decal and the color is certainly not yellow green. If anything I'd say it was slightly darker green than the other five centers. I would just call it green (like the others) and

State Revenue News

eliminate the yellow from the description. I also have a Ketchum-Morris 40 cent red-orange (or salmon) decal with no serial number, heretofore unlisted. I have take the liberty to crown it L184AS.

New York

I have the following stamps from the 1908-1911 stock transfers all used with no overprint.

- ST40c 2ct brown
- ST45b 20ct black
- ST54d \$1 deep red
- ST54e \$1 rose

South Carolina

In April 2008 several new values for the 1969 South Carolina business license decals surfaced on Ebay.

- BL173A 16ct orange-red
- BL173B 20ct orange
- BL173C 20ct pale green
- BL174 24ct white

Maine

This used strip of Maine beers contains a pair that are perforated vertically (B1g) but also two pairs that have roulette perforation in the same strip.

North Dakota

South Dakota

The SRS catalog doesn't list a specimen for South Dakota OL1, but here one is with a Columbian Bank Note perfin. OL1S.

Texas

I have a Texas beer \$4.65 B30A from the Hubbard Nutmeg collection sales and described as "very Scarce stamp, 1 of 2 in Hubbard Collection of which this is the finest". In the SRS catalog. In the catalog only the proof is listed, but mine has a serial number (366) and is mint no hinge in perfect condition. On the back in pencil is RRR, apparently written by Hubbard himself since that was the grading system he used.

Added to catalog.

Washington

I think the apple AP35b should be AP35d and move the "d" notation (dot in front of "THE" in seal) up from the next set. That's my reading of it in looking at how Hubbard had it.

I stand corrected.

Here is a North Dakota L46 12ct liquor decal, but with the "50% or Less Alcohol by Weight" overprint in black instead of red. This will become L46a.

I am trying to figure out the SRS numbers for these North Dakota beers. They are roulette 6-1/2. The 18ct shows a fugative "CANCELLED" panel. They both look like B56 but say "TAX COMMISSIONER" instead of "STATE TAX COMMISSIONER". They have red serial numbers and the two circular panels are yellow. The 18 cent is pale rose and the 24 cent is pale lilac. Both are for "4% OR LESS ALCOHOL".

These are something unreported and I've given them the catalog numbers B53A and B53B.

South Dakota

Hinselman signature horizontal perforated 12-1/2, yellow \$.0454 value (12-12 oz) not listed in the SRS catalog but definitely from the 1937 set. I'd call it BW13A.

No. RB 1237

1958 ANNUAL NON-RESIDENT FISHING LICENSE

PERMIT TO SHIP GAME FISH

Must be attached to shipping container. This permit allows shipment of one day's legal catch of game fish. Licensed fishermen may non-size catch on one package if permit of each is attached.

MICHIGAN DEPARTMENT OF CONSERVATION
Valid after December 31, 1958

End of Auction

FISH AND GAME UPDATE by J. R. Wooton

WYOMING

While a number of states shift to electronic generated licenses, Wyoming continues to issue a wide variety of stamps related to hunting and fishing. The year 2008 saw five different stamps/permits issued.

\$12.50 Conservation stamp – multicolored

\$10.00 Wildlife Damage Management stamp – black and red on light blue

\$10.00 Utah Flaming Gorge Reciprocity stamp - black and red on gold

\$12.50 Pheasant Special Management Permit (stamp) – black and red on light green

\$12.50 Elk Special Management Permit (stamp) – black and red on light blue

\$12.50 Light Goose Conservation Order Special Management Permit (stamp) – black on green

Light geese are defined as snow geese, blue geese, and Ross's Geese. These are the only geese that have been hunted in Wyoming for the past four years. The general season for hunting other species of geese has been closed during this time because of drought conditions. This particular permit (stamp) is a self-adhesive die cut stamp issued affixed to a harvest survey card.

LAST NAME	FIRST NAME	M.I.	DATE OF BIRTH
STREET ADDRESS OR POST OFFICE BOX			
CITY	STATE	ZIP CODE	
PHONE	DATE	STAMP NUMBER	0806

MANDATORY REQUIREMENT - WHETHER YOU HUNTED OR NOT, YOU MUST COMPLETE AND RETURN THIS SURVEY CARD NO LATER THAN APRIL 20, 2008

Chapter 48 of the Commission Regulations requires, "Any person who obtains a Conservation Order Special Management Permit shall accurately complete the survey card provided with the permit and return the survey card to the Headquarters Office in Cheyenne no later than April 20, 2008." The survey card shall be complete whether the person participated in the Conservation Order or not. Failure to return the survey card shall be a violation of Commission regulation and punishable as provided by Wyoming Statutes for violation of Commission regulations.

Michigan Malts - Part III A Dialogue with Mack Matesen

This is in reference to the article on Michigan malts by Scott Troutman in the 4th quarter 2008 SRN, a follow up to an article by Jim Timpson in the 3rd quarter 2008 SRN.

Mack - First, as to Mr. Bonson's statement wherein you note "Pieter also pointed out that the description of the MA23-24 set in Hubbard's catalog saying, that it is the SAME (my emphasis) design as the MA18 set", is wrong. Mr. Bonson is in error not Hubbard. My copy of Hubbard's 1960 catalog makes no mention as to MA23-24 being of a like design to MA18.

Scott - Your right, the problem is in my SRS catalog, where I mistakenly thought the difference was in the mottled paper. Pieter was trying to point out there is more than just paper differences but also a different design I had overlooked.

Mack - Next, as you close your article, you stated that the illustration at the right was "brown orange on pink, with mottled pink back". Sure looks red, or carmine or orange red to me.

Scott- That is precisely the point we were trying to make. The scanning process, on both scanners and copiers can distort this color. I was able to duplicate the problem on my Canon Lide scanner. But the stamp is brown-orange for real. John Funkhouser ran a test on copies he had on his Epson scanner and had similar results.

Mac's MA24's

Mack - Shown is a scan of my MA24 juxtaposed with the MA24 in the article. Do they even look the same? Mine is brown orange and looks nothing like your MA24 illustration.

New background MA24 circular background

Scott - The color on the copy in the article is already distorted. Apparently your scanner does not distort the color. But the interesting thing is the left stamp, is not the stamp from the article, because it has yet a different background. On the MA24 the background is circles centered at the center of the stamp. On your right stamp the background is semi-circles radiating from the center of each of the four borders. Another new design!! And there could be a five cent stamp with this design also. We can probably say there are shades on these stamps.

Mack - This second illustration has the MA24 with the circular design on the pink paper with the mottled back at left. At right is the same design but a different color and guess what - no mottled background.

Scott - The right one looks to me (and I can't judge the color distortion) like the MA24 design on an almost white paper. The MA18-20 set was on a white paper, so maybe this was a short lived version using the last of that paper. I would call this MA24a, a paper variety. Printing the brown orange on white paper instead of pink would probably account for the color difference between these two stamps.

Everybody check your collections and let the editor know if you find still more varieties.

Oregon Paper License Plates

by Jim Timpson

These two Oregon paper license plates came up for sale on Ebay in late 2008. The yellow and red 1945 with black serial numbers sold for \$73. The maroon and white 1946 brought \$54.78. The map shaped 1944 self adhesive also realized \$73.

State Revenue Stamp Research Help Needed

SRS catalogers and researchers need your help. They are missing illustrations and or identifying information for the following list of state revenue stamps. if you have information that may help, please provide a photocopy or scan. Unless color copies or scans are sent, identify the color and perforations for the items sent. In order to make it easy for member to respond. We will forward your information to the appropriate cataloger/researcher. SRS catalog numbers are used unless otherwise indicated.

SRS Sales Philosophy

Why does the SRS purchase these stamps? The following rules of thumb apply:

- There is a discount for a large order which can be passed on to the SRS members.
- The sale of the stamps will expire before SRS members can be notified in the newsletter.
- The stamps are non-fish and game.
- The stamps are fish and game stamps that are not readily available.
- There is a minimum purchase requirement.

Note: Certain stamps may have a purchase limit to give all members an opportunity to obtain these stamps.

Donations

Monetary donations were sent in by Barry Ellis and WJRP Bishop (from London) with their dues. Thank you.

Monetary donations should be sent to the treasurer Harold Effner Jr. at 27 Pine Street, Lincorft, NJ. 07738.

and Lots More

LETTERS TO THE EDITOR

New Finds

I have this Ohio C5 but with Columbia Bank Note Company imprint unlisted in the SRS catalog. I have both mint and used copies. This may not be a new item if the stamps were produced without applying the imprint to each stamp. Can anyone tell us if that is the case?

I also have used copies of the Pennsylvania ST28 \$10 and ST29 \$20 stamps. They are listed in the catalog as only specimen's known.

The Delaware meters noted in the SRS 4th quarter 2008 also come in purple, blue and green.

J.F. Gates Clarke
Delaware

More Meters, More Meters, More Meters

Shown is what I assume will be Delaware CM0A, green in color, series 20000 meter. Note the DELAWAPE spelling error.

Harold Effner noted the top of the "6" is also missing and it appears the strike is just on a crease in the celophane.

Here are two new Iowa meters, the upper in green and the lower in blue green.

These will be CM2a and CM2b respectively.

On Kentucky, the 2 cent and 3 cent were just updated - here is CM0A the missing one cent.

I also have a Texas CM2 in purple instead of magenta.

Kent Gray
New Mexico

Comments That came in With Dues

If you are going to publish new updates in any issue please put on a separate page or a single page so we can punch and put in the SRS catalog.

Denny Peoples
Indiana

Color in the State Revenue News is great! Any chance the next edition of the catalog will also be in color.

Olaf Leifson
California

Most of the pictures in the catalog were scanned in black and white and the cost is pretty prohibitive, so no plans at this time to colorize the catalog.

Please don't forget members who do not have internet access. Having been a member of other collector groups I have observed declines in membership 3-5 years after changes in bylaws. Formation of rules tends to coincide with loss of passion for whatever brought the group together to begin with.

Jack Epter
New York

Wow, it's been over 30 years now that I've been with the SRS. Time flies.

Thomas M. Lampkins
New York

Consider using a SASE for dues. People will respond faster.

Stephen Patillo
California

We'd rather keep the dues cheap and let you come up with the envelope and stamp.

Nice to see increased use of color. Hope to see you continue to sell Colorado habitat stamps at a discount.

Ira Cotton
Nebraska

Little Mystery

I know exactly what your "Little Mystery" item is in the 4th quarter 2008 issue of the SRN. It is a piece of emergency money issued by Schwegmann Bros. Giant Super Markets, of New Orleans, in 1974 because of a local shortage of pennies. This super-market chain already issued food stamp change scrip, and the design of the emergency note and much of the text was copied from this scrip. Then they found these long, narrow notes to be inadequate, perhaps awkward to handle. So, they issued a second issue that were half as long. The FSC scrip and both issues of emergency notes were printed by the same printer. (See imprint on the reverse.) I own examples of all of these.

Michael Florer
Pennsylvania

Michigan Wines

With respect to the pictures on the Michigan wines on page 26 of the last issue. Indeed, the picture is W107 and the other picture is W125. The picture in the catalog above W125 is wrong, that is W89. The descriptions in the headings are correct.

John Funkhouser
Mexico

Florida

The headings for a couple of citrus issues mention "7 of 10 stamps are straight edged". I have panes of 10 of two of them, straight edged all around. It might be better to simply say "Panels of 10"

I have mint examples of feeds FE1,FE2, FE3,FE4, FE5, FE7, FE9,FE9a,FE12,FE13, FE14,FE15,FE16,FE20 and fertilizers FT1 and FT10.

John D. Bowman
Texas
